## Who We are ?

As the premier green energy educator in MN, GoSolar! Kidz has introduced more youth to green energy concepts than any other organization. Our mission is to spark interest in renewable resources through practical, hands-on learning experiences.

## Why choose us?

At GoSolar! Kidz, we make learning fun and meaningful. Our camp combines the excitement of building solar-powered cars, robots, and go-karts with key lessons in teamwork, sustainability, and creativity. In a safe, supportive environment, kids explore their potential, gain hands-on knowledge about green energy, and develop problem-solving skills.
